

EFOSA EZEKIEL OJOMO

AI Product Owner | Technical Program Manager | Solution Architect

New York, NY | ojomoefosa@gmail.com | +1 217-294-7325 | ojomoefosa.com

Certified Scrum Master (PSM I) • Certified Product Owner (PSPO I) • AWS • Azure • Kubernetes • LangChain • OpenAI

PROFESSIONAL SUMMARY

AI Product Owner and Technical Program Manager with 8+ years of experience leading end-to-end delivery of enterprise AI and cloud-native products. Proven ability to run service design workshops, translate complex business requirements into AI opportunity maps, define product roadmaps, and drive cross-functional delivery teams from ideation through scale-up.

Deep expertise spanning both the product side (discovery, value proposition, prototyping, user stories, Scrum ceremonies, KPI definition, rollout planning) and the program side (timeline governance, stakeholder reporting, API approvals, deployment coordination, infrastructure facilitation). Experienced in AI model performance testing, UX collaboration, and scaling AI use cases from 1-to-10.

Led AI/ML product initiatives generating \$2M+ in annual value, achieving 99.9%+ system reliability, and reducing manual effort by 80% across 500+ enterprise clients.

AI PRODUCT OWNER COMPETENCIES

PRODUCT

- ▶ Service design & business requirement discovery
- ▶ AI opportunity mapping & value proposition estimation
- ▶ Product roadmap creation & feature prioritization
- ▶ Interactive prototype design & UI/UX collaboration
- ▶ Epic, feature, user story & task definition
- ▶ Scrum standup facilitation & sprint tracking
- ▶ AI model performance & functional testing
- ▶ KPI definition & post-production performance tracking
- ▶ Rollout planning, communication plans & scale-up (1→10)

PROGRAM

- ▶ Timeline management & delivery governance
- ▶ Status reporting & executive stakeholder reviews
- ▶ API / APIGEE approval process facilitation
- ▶ Cross-team deployment scheduling & coordination
- ▶ Infrastructure setup & dev team dependency management
- ▶ Agile / Scrum ceremonies across frontend & backend teams
- ▶ Risk identification, escalation & mitigation planning
- ▶ Enterprise integration & compliance governance

KEY IMPACT METRICS

80%

Reduction in manual effort through AI-powered automation pipelines deployed across 50+ enterprise clients

\$2M+/yr

Annual value delivered through AI product roadmaps, cloud optimization, and intelligent automation strategies

85%

Reduction in manual processing achieved via AI microservices with ML model integrations (FastAPI + LangChain)

8 Releases	Major AI and cloud product releases delivered on schedule, increasing customer retention by 25%
35%	Improvement in customer satisfaction by closing product feedback loops into AI feature backlogs
99.9%+	System uptime maintained post-production through KPI-driven monitoring and proactive SLO governance

TECHNICAL SKILLS

AI / GenAI	OpenAI API LangChain LLM integration AI model performance testing Prompt engineering scikit-learn TensorFlow
Product Tools	Jira Confluence Figma / prototyping Miro Roadmunk ServiceNow API design (REST, GraphQL, APIGEE)
Cloud Platforms	AWS (Lambda, EC2, API Gateway, Step Functions) Azure (AKS, Functions) GCP Kubernetes Docker Terraform
Backend / APIs	Java / Spring Boot Python (FastAPI, Flask, Django) Node.js TypeScript Kafka Microservices REST / gRPC
Data & Analytics	PostgreSQL MongoDB Redis ETL Pipelines Elasticsearch Pandas NumPy
Observability	Datadog Prometheus Grafana ELK Stack Splunk SLI/SLO design KPI dashboards
Agile & Governance	Scrum SAFe Sprint planning Backlog grooming Epic/Feature/Story writing Stakeholder governance Risk management

PROFESSIONAL EXPERIENCE

AI Product Owner & Technical Product Specialist

Vertex Inc · Remote

Jun 2024 – Present

- Led service design workshops with C-level and business stakeholders to identify AI use case opportunities, map pain points to AI techniques, and estimate value propositions for enterprise web applications serving 200+ clients.
- Owned end-to-end AI product roadmap: defined epics, features, user stories, and tasks; facilitated daily Scrum standups and sprint reviews with frontend, backend, and infrastructure engineers.
- Designed LLM-powered APIs using OpenAI and LangChain to automate compliance and reporting workflows, cutting manual review time by 85% across enterprise clients.
- Led testing of AI model performance (accuracy, latency, hallucination rates) and functional integration testing, defining KPIs and post-production monitoring dashboards in Datadog.
- Managed program-side governance: tracked deployment timelines across 50+ microservices, facilitated API APIGEE approval workflows, coordinated cross-team deployment scheduling, and produced executive status reports.
- Drove rollout planning and communication plans for 8+ AI feature releases; scaled proven use cases from pilot (1) to enterprise (10), achieving 99.9% SLA and reducing P1 incidents by 45%.
- Led ERP integration of 15+ SAP systems, collaborating with architects and UX designers to deliver solutions optimizing \$10M+ in annual enterprise workflows.

AI Product Owner & Solution Architect

Microsoft (LTMindtree) · Hybrid

Sep 2022 – Jun 2024

- Ran discovery and service design sessions for Azure-based AI analytics platforms serving 100+ enterprise clients handling 5M+ daily requests — identifying business requirements, process pain points, and AI mapping opportunities.
- Owned the product backlog: prioritized 200+ items, wrote epics and user stories, and led Scrum ceremonies across frontend/backend teams to deliver 8 major AI product releases.
- Implemented AI-assisted analytics and predictive workflows, increasing customer data insight efficiency by 30% and team productivity by 30%.

ordinated program-side execution: managed timelines, produced stakeholder governance reports, facilitated infrastructure provisioning needs, and managed dependencies across 3 cross-functional teams.

- Defined KPIs, SLOs, and post-production performance metrics; implemented automated monitoring reducing unplanned downtime by 50%.
- Mentored 5 engineers on AI integration best practices, establishing coding standards that improved delivery quality by 40%.

Technical Product Owner & Cloud Architect

May 2022 – Sep 2022

Amazon · Hybrid

- Led Agile delivery of AI-driven cloud applications serving millions of daily users — managing backlog, sprint ceremonies, and cross-team dependencies across 15+ engineers.
- Implemented LLM-powered anomaly detection and serverless AI workflows on AWS Lambda + Step Functions, improving incident response time by 70%.
- Developed automated diagnostic tools that reduced customer issue resolution time from 4 hours to 45 minutes; documented runbooks and rollout communication plans.
- Facilitated API integration approvals and deployment scheduling across multiple technology teams, achieving 99.8% deployment success rate.

AI Product Owner & Full Stack Architect

Oct 2020 – Oct 2021

Mind Machine · Remote

- Led full lifecycle AI product development: conducted discovery, created interactive prototypes, collaborated with UX designers, defined user stories, and owned the sprint backlog for ML-powered applications.
- Built AI microservices with FastAPI and ML integrations reducing manual processing by 85%; exposed real-time prediction APIs consumed by React dashboards for 50+ enterprise clients.
- Defined and tracked KPIs post-production, improving system reliability from 95% to 99.2% uptime through data-driven product iteration.
- Managed customer feedback loops and support processes achieving 92% customer satisfaction and reducing support ticket volume by 30%.

Scrum Master & Software Engineer

Oct 2018 – Oct 2020

Smarter Grid International · Onsite

- Led Agile team of 8 developers as Scrum Master: facilitated standups, sprint planning, retrospectives, and backlog grooming for IoT energy management products.
- Defined technical requirements and prioritized features based on business value, reducing average issue resolution time from 6 hours to 2 hours.
- Architected IoT data processing platform handling 50M+ daily sensor readings at 99.9% reliability; implemented 24/7 monitoring with automated alerting and runbook execution.
- Established 95% test coverage and post-deployment performance standards; reduced defects by 50% and downtime by 70%.

EDUCATION

Master of Technology, Computer Technology · Eastern Illinois University

2023 – 2024

Master of Engineering, Computer Electronics Systems · Politechnika Gdańska

2020 – 2022

Bachelor of Engineering, Electrical & Electronics · Ambrose Alli University

2012 – 2017

CERTIFICATIONS

Professional Scrum Master (PSM I)
Professional Scrum Product Owner (PSPO I)
Core Java Developer
Angular Developer

Azure App Service Development Specialist
UI/UX Designer
PMP Certification (In Progress)
ITIL Foundation (In Progress)
